

Following Christ in a Scientific World

What's next?

We live in a scientific world

**How do we answer questions
about science and faith?**

**How do we learn more about
science and faith?**

What do we do next?

Monthly Book Club

Discuss topics on
science & faith

Every 3rd Wednesday each
month at 7:00pm

A dozen regular attendees

December Book Club

Wednesday, December 12th

7:00pm in Church Library

**“Lost World of Genesis One”
By John Walton**

Science and Faith Courses

JJ 2011 – Are Your Children Safe in Science Class?

Teen 2011 – Wrestling with Science and Faith

AD 2012 – Following Christ in a Scientific World

Next - ???

Welcome to GC Science at Grace Chapel
GC Science is a network of scientists at Grace Chapel dedicated to helping the congregation integrate mainstream science and Christian faith.

next Monthly Book Discussion Group
September 19th Wednesday in GC Library @7pm (wrap up by 8:30pm)

GC Science Registration
Are you a scientist at Grace Chapel? We'd like to connect!

Following Christ in a Scientific World
10-week class team-taught by the GC Science Team, beginning September 16th at 9:15am in ALC 205. Scientists at Grace Chapel will empower Christians to face the challenges presented by modern science by explaining how science and Christian faith can be reconciled. Personal testimonies and Biblical approaches to addressing science and faith issues will make it easy to answer questions on evolution and other scientific theories.

Are Science and Faith in Conflict?
What do you think? Watch this video from the Biologos foundation. This video claims that the 'science and faith conflict' is a myth. Do you agree?

"Like" us on facebook and join a global community of over 100,000 other Christians who love science!

Stop in to read some of the lively discussions about science and faith and how to respond to atheism.

D.C. wrote: You guys have really inspired me to accept theistic evolution. Or at least consider it more and show more openness to it. Aug 2012.

J.S. wrote: I just wanted to say this: I am an agnostic who normally finds the Christian stuff online to be sickeningly closed-minded. This page, however, is different. It showed me that I was being closed-minded about Christians, and I need to open my heart to them once more. If God exists, I'm sure he would be proud of his people right now. Sept 2012.

Panel Discussion and Questions

GCScience

A Network of Scientists at Grace Chapel

**Is mutation the primary mechanism
for adding diversity in the genome?**

Different mutations happen at different rates

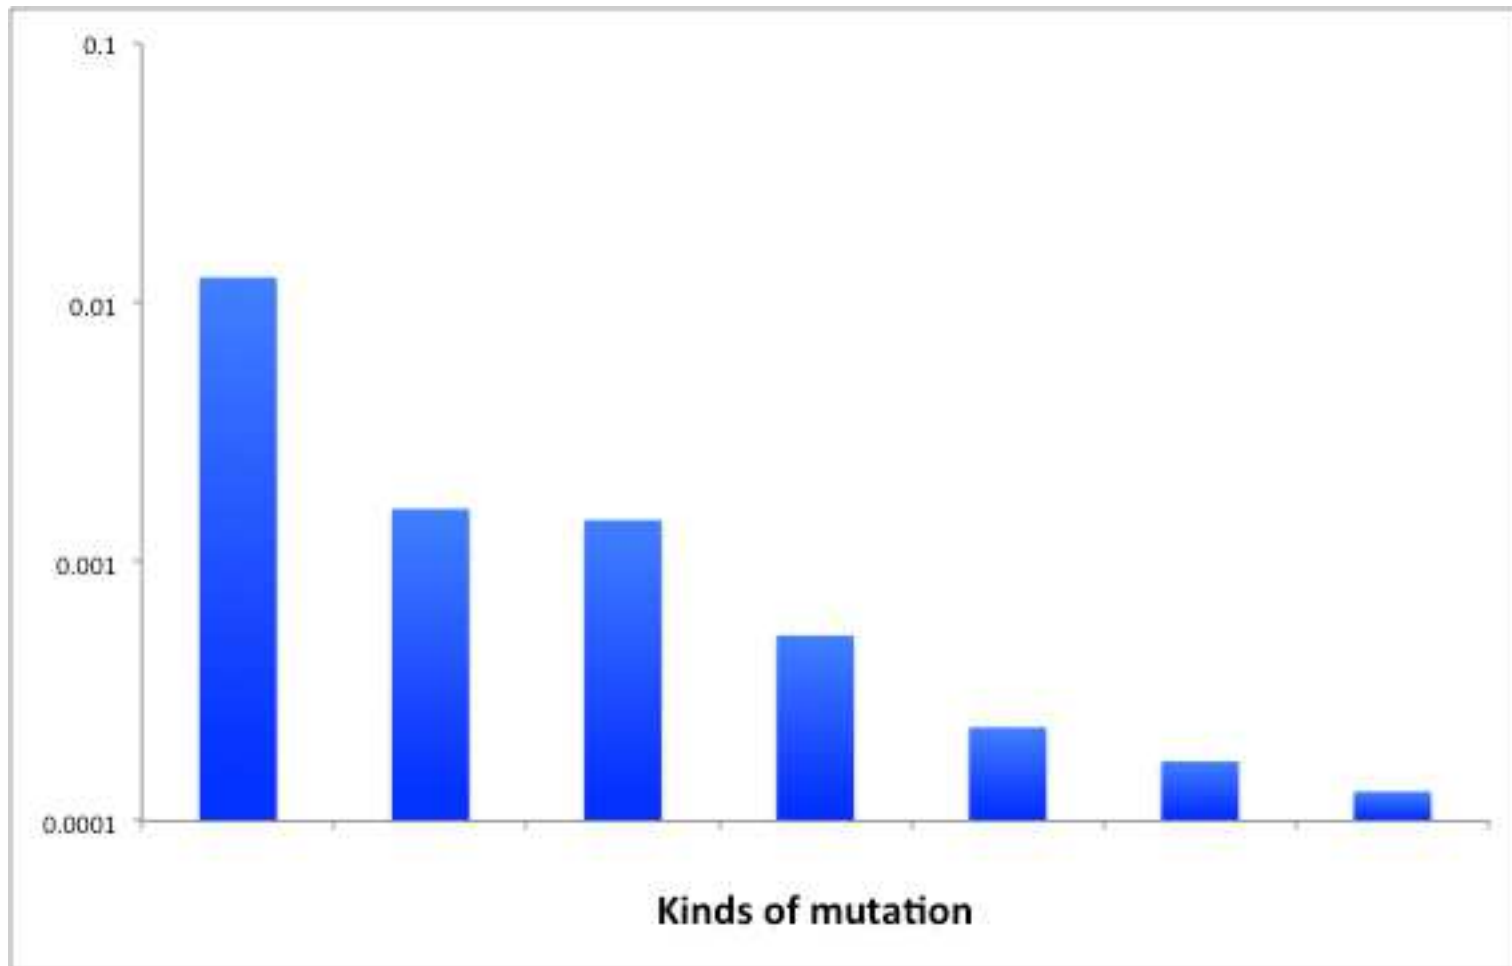

Genetic diversity matches the pattern of mutations

The same pattern appears for differences between species

The same pattern appears for differences between species

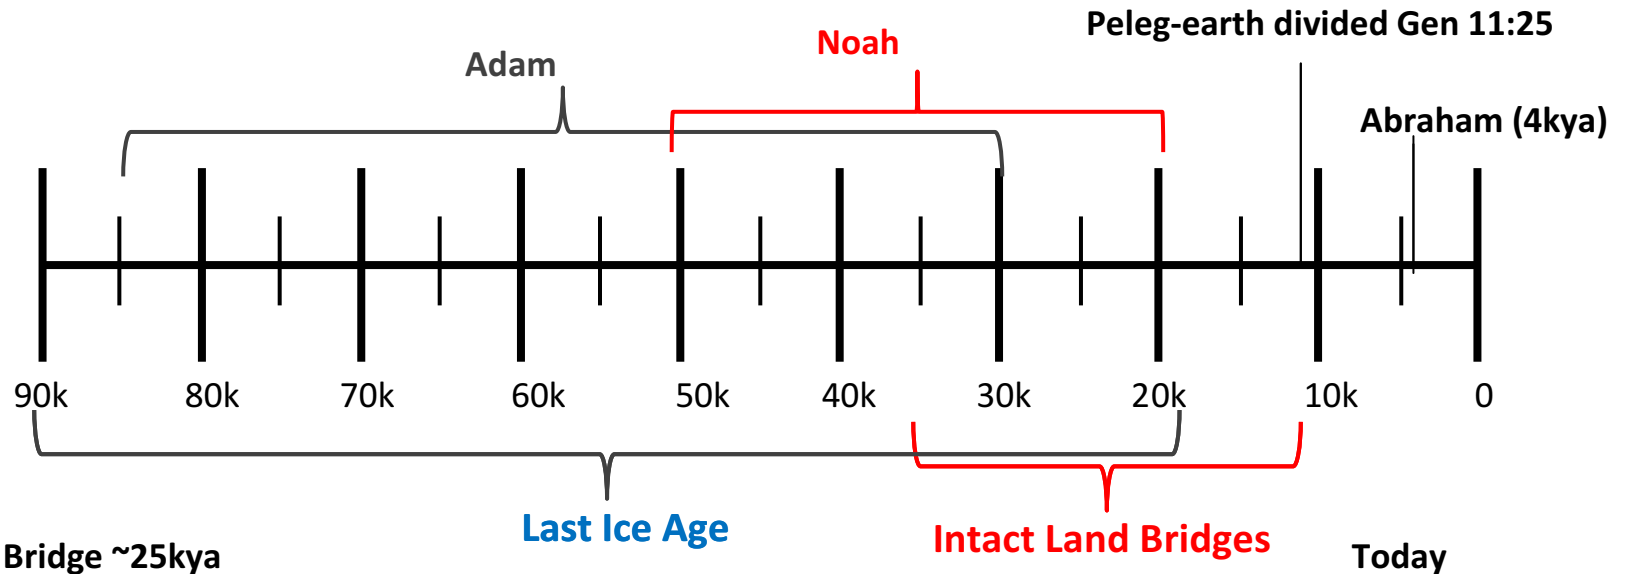

What is the evidence for evolution?

What do we make of the Garden of Eden?

How does the Flood match up with the history of life, including evolution, and geological history?

Flood of Noah- When? (Speculative)

Bering Land Bridge ~25kya

- Bering land bridge during last glacial max
- Warming at ~14,000ya for food sources needed for migration
- Bering opened ~11,500ya – sets time of Peleg
- Warming end of glacial period ~500 ft change sea level

Today

Flood of Noah-How? and Where?

- Persian “Gulf Oasis” landmass probable epicenter for flood
 - Landmass exposed periodically (150-12kya) (Rose, Curr. Anthro. 12/2010)
- Flood extent includes Mesopotamia, Persian Gulf and portion of southern Arabian peninsula
 - Rain, burst springs, plus ice and snow melt from mountains
 - Flood extent- assumed a region <300-400m above sea level

Middle East Region Today

Flood extent- ~1000 x 300 miles

Middle East Region 40-50kya

**Why aren't there more intermediates
between species?**

**How does the “science perspective”
strengthen my faith?**
